

Below is a quick fact sheet regarding advertising partners based in California. Keep in mind that ShareASale is just one of many advertising networks, and these numbers (while significant on their own) reflect only a portion of a larger industry. All of these advertisers are at risk as their contracts will likely be terminated upon legislation such as AB 178.

Quick fact sheet for the State of California

The State of California has approximately 25624 advertisers who utilize the ShareASale advertising platform. These advertisers are all based in, or maintain operations within the State of California and would likely see their income drastically affected should legislation pass that would leverage their existence into "nexus".

Keeping in mind that ShareASale is just one of many niche retail networks, the impact numbers below are likely even greater than they appear.

Number of advertisers: **25,624** advertisers based in California.

Collective advertising income generated from out-of-state retailers since 1/1/2008: **\$3,305,775.00**

Cities where these advertisers live (user entered data):
